The standard package is our software's gateway, enabling you to

- **Create chemical registers and manifests**
- **Evaluate chemical and occupational risks**

BUSINESS MODULES

Choose from among these professional, comprehensive "thematic blocks". They enable you to create a software package that meets your company's OHS needs.

- **ORA module***
- **CRA module****
- **Harmful working conditions module**
- **Tracking module**

MANAGEMENT OPTIONS

The options selected will provide a base from which to administer all your company's OHS measures.

- **Rights administration**
- **Personal data analysis**
- **Action plans**
- **Personnel management**

TRAINING DESIGNED WITH YOU IN MIND

We are committed to helping all Pulsse users make the best use of our software. This is why each of our customers receives training customised to their business and instructional needs. Various training methods are available for this purpose :

- **Remote training:** self-training without an instructor
- **In-house training:** training within your company by an instructor

BESPOKE SUPPORT

- **Support for managing your software project**

We provide expert support and project management experience to software customers.

This service is based on the principle of training your employees so that internal experts are available to help your entire team improve their skills.

* Occupational Risk Assessment

** Chemical Risk Assessment

DEDICATED IT SUPPORT

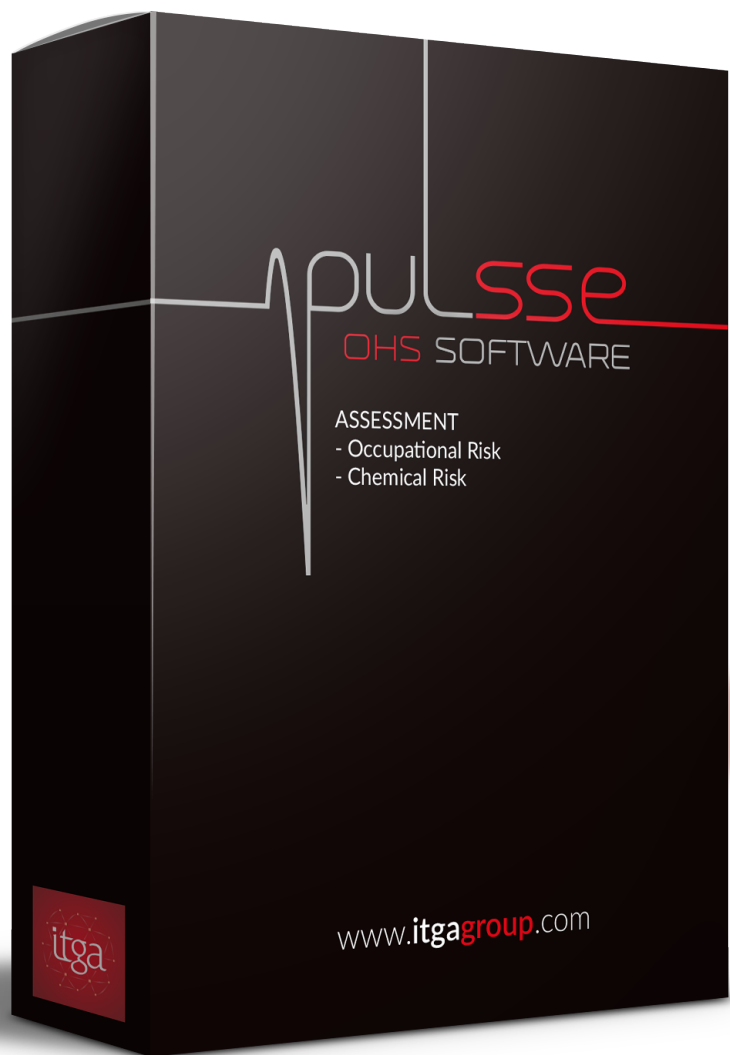

- **Online Assistance :** We have developed a Web Assistance portal so customers can get answers to their questions. It's called Freshdesk. Using this platform, you are directly connected with our software package team who will answer all your technical and business questions.

- **Telephone Hotline :** From Monday through Friday, the ITGA software package team is available to answer any questions about your solution, including installation, use, maintenance and troubleshooting.

WHY CHOOSE PULSSE ?

■ **It's a modular software program that adapts to all OHS practices :**

With its business modules and management options, each user has the Pulsse version that best fits how they use the software.

■ **It's software backed by experience and expertise :**

We have 15 years of experience and a dedicated IT team.

■ **It's an SaaS solution :**

- You just need an internet connection to use the software.
- Manage costs with an all-inclusive subscription system.
- Our expert hosting partner provides security and guaranteed data recovery.
